#### PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (I) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

## SUMMARY

Rovno Army Barracks and Headquarters 10th Guards Mechanized Division is in the north-west corner of Rovno on both sides of the road to Lutsk. The 250-acre installation is served by good all-weather roads and has access to rail sidings.

Within the installation are 22 multistory barracks, eight multistory administration buildings, 35 administration buildings, four vehicle maintenance buildings, 13 vehicle storage buildings, 43 storage buildings, 18 support buildings,

and an athletic field.

The installation appears active. Little or no change has taken place since it was first observed in [REDACTED]. Many buildings not discernible in [REDACTED] became apparent on better quality later photography. The appearance of these buildings reflects better film resolution and quality, rather than new construction.

The installation was covered by [REDACTED] KEY-HOLE missions between [REDACTED]
